

**Set your own goals** and **go the distance** with OLG Short Learning Programmes.

**NOF**  
**Level 6**

## Intermediate Logistics Management (NOF Level 6)

This short learning programme will suit individuals who want to develop competencies to understand logistics concepts as well as the management of logistics operations within an organisation.

### What can students expect?

The student will be exposed to some the following learning areas:

- Explain how to develop a logistics and supply chain strategy
- Explain the forecasting process and define the various forecasting techniques and when to apply these techniques
- Explain how network integration impacts on supply chain design
- List the stages of supply chain design and implementation
- Explain the various aspects to consider when designing a storage and handling facility
- Define and explain the various cost structures for the different modes of transport
- Distinguish between the different tariff-quoting techniques available in transport costing

### Admission requirements

Fundamental knowledge and/or experience in Logistics Management is a prerequisite for this intermediate programme.

### Duration and mode of delivery

This programme is delivered through:

- Contact sessions that include training from industry experts and practical on-the-job advice.

**OR**

- A blended mode, offering limited contact classes combined with open distance learning.
